

The Major Astrological Events of 2015

Here, handily summarized, you will find the dates and degrees of all the stations and eclipses in 2015—plus any conjunctions, oppositions or squares between the slower-moving planets Jupiter, Saturn, Uranus, Neptune and Pluto. These are shown in boldface. This year, in lighter type, we've also added all hard aspects from Mars to these planets.

- *Page 2* shows these important astrological events in the usual arrangement by date. Note major action in March, with a solar eclipse and the final Uranus-Pluto square in the series of seven since 2012. This year, rather than being reinforced by Jupiter, the square is reinforced by Mars conjunct Uranus and square Pluto. This is echoed on July 25-26 by Mars square a stationing Uranus and in December by Mars square Pluto and opposition a stationing Uranus. The other major events occur on August 2-3 when Jupiter squares a stationing Saturn, and on November 18-26 when Saturn squares a stationing Neptune.
- *Page 3* arranges these events by their degree within each sign mode, making it easy to see how they would conjunct, square or oppose your chart points. Also, the column headed “45°/135°” shows the degree and mode where these events would contact your chart by semi- or sesqui-square (which, especially when they involve major transits, can also have noticeable effects). To see how the major transits of 2015 affect you, compare this table with the degrees in the Cardinal, Fixed and Mutable signs in your natal chart (and maybe also your progressed, solar-arc-directed and return charts). Sorting the events by mode and degree shows the year's most emphasized degrees—in 2015 most notably 11°-16° of the Cardinals, with five of these hits, including the Uranus-Pluto square, being at 15°. In the fall there are also four hits at 7° Mutable, all of which involve Jupiter, Saturn and Neptune.
- As a bonus, *the bottom of this page* shows the monthly positions of not only the planets, but also the potent, but often overlooked, midpoints of the planets Jupiter through Pluto. These, too, can have a noticeable effect through square, opposition and semi- and sesqui-square aspects as well as conjunctions to chart points.
